- 1 The resident knows the indications, contraindications, potential complications and appropriate doses of medications used for procedural sedation
 Yes ☒ No ☐ N/A ☐
- 2 The resident performs patient assessment and discusses with the patient the most appropriate analgesic/sedative medication and administers in the most appropriate dose and route
 Yes ☒ No ☐ N/A ☐
- 3 The resident performs pre-sedation assessment, obtains informed consent and orders appropriate choice and dose of medications for procedural sedation
 Yes ☒ No ☐ N/A ☐
- 4 The resident ensures appropriate monitoring of patients during procedural sedation
 Yes ☒ No ☐ N/A ☐
- 5 The resident performs procedural sedation providing effective sedation with the least risk of complications and minimal recovery time through selective dosing, route and choice of medications
 Yes ☒ No ☐ N/A ☐
- 6 Given the above, please rate the resident on this milestone:
 Uses goal-directed focused Ultrasound for the bedside diagnostic evaluation of emergency medical conditions and diagnoses, resuscitation of the acutely ill or injured patient, and procedural guidance

PGY-2 LEVEL

Knows the indications, contraindications, potential complications and appropriate doses of medications used for procedural sedation

PGY-3 LEVEL

Performs procedural sedation providing effective sedation with the least risk of complications and minimal recovery time through selective

ATTENDING LEVEL

Develops pain management protocols/care plans

MEDICAL STUDENT LEVEL

PGY-1 LEVEL

Knows the indications, contraindications, potential complications and appropriate doses of analgesic / sedative

Performs patient assessment and discusses with the patient the most appropriate analgesic/sedative medication and administers in the most appropriate dose and route
 Performs pre-

medications

sedation assessment,
obtains
informed consent and
orders appropriate
choice and dose of
medications for
procedural sedation
Ensures appropriate
monitoring of
patients during
procedural sedation

dosing, route and
choice of
medications
